

## Course Information KB7014

### **Book + course materials:**

Principles and Techniques of Biochemistry and Molecular Biology (8<sup>th</sup> edition). Edited by Andreas Hofmann and Samuel Clokie (Cambridge University Press). Hand-outs, articles etc. will be provided.

**Jan-Willem de Gier**

**Department of Biochemistry and Biophysics**

**Stockholm University**

**S-106 91, Stockholm**

**Sweden**

**tel: +46-8-162420 (office)**

**Email: [degier@dbb.su.se](mailto:degier@dbb.su.se)**

**Some golden rules:**

**-Be on time (9 o'clock we start).**

**-Lectures, tutorials and the practical are compulsory: i.e., you must attend them. Not attending seminars (lectures) and tutorials, and not handing in the assignments before the deadline will result in being excluded from doing the exam. If there is a problem you contact Jan-Willem de Gier ([degier@dbb.su.se](mailto:degier@dbb.su.se)). Attendance of seminars (lectures), tutorial and the practical will be monitored using lists that have to be signed.**

**-If the score of a tutorial was '-' a corrected version of the assignment has to be handed in within 2 days after the tutorial. All tutorials should be '+' or '++' to be able to do the exam.**

**-Lab reports handed in after the deadlines won't be considered. No lab reports means no final mark.**

**-For being able to do the overexpression practical the molecular biology tutorial has to be passed.**

**-All the students should have signed the SU papers stating what SU considers plagiarism and what happens if plagiarism is detected before they start with KB7014. If plagiarism is detected in first versions of lab reports and assignments this will also be reported to the university.**

**-Students make their own assignments and lab. report (this of course should not prevent students from having discussions etc.).**
